## Summary

Final-year CS Engineering student at HBTU Kanpur specializing in full-stack development with TypeScript, Node.js, React, and PostgreSQL. Experienced in building scalable REST APIs, event-driven architectures (Inngest), and AI-integrated backends using LangChain and FastAPI. Active competitive programmer with 1750+ LeetCode rating and 500+ DSA problems solved across platforms.

## Education

**B.Tech. HBTU Kanpur** | Computer Science Engineering | **CGPA: 7.33/10** Aug 2023 – July 2027  
**S. R. Education Centre, Kanpur** | **12th:** 92.3% (June 2022)   **10th:** 91.6% (June 2020)

## Experience

**Kanpur Electricity Supply Company Limited – Data Analyst and Software Development Intern** Jun 2026 – Jul 2026

TypeScript, Node.js, Express, React, PostgreSQL, Prisma [GitHub](#)

- Built a **Substation Information System (SIS)** with a PostgreSQL/Prisma schema and role- and area-scoped RBAC across 4-tier hierarchy to digitize 33/11 KV substation data across 100+ parameters.
- Engineered a bulk Excel import pipeline with dependency-ordered validation across 11 entity types, replacing manual Excel-based data collection.
- Implemented JWT authentication and a layered Express architecture with audit trails and soft-delete mechanisms across entities, improving access control, data traceability, and safe data management.

## Projects

**GraminIntel – AI Farming Assistant** | Node.js, TypeScript, FastAPI, LangChain, Inngest, Twilio [GitHub](#) Feb 2026

- Engineered the backend for an AI-powered farming assistant serving rural users through WhatsApp and voice calls.
- Built an Inngest event-driven pipeline integrating Twilio, real-time weather APIs, and Tavily web scraping to automate the query-to-response workflow.
- Built a LangChain RAG pipeline with vector database storage, grounding responses in domain-specific agricultural knowledge to improve query response accuracy.

**Rath – Ride Booking Platform** | React, Node.js, Express.js, MongoDB, Socket.IO, Google Maps API [GitHub](#) Aug 2025

- Built a full-stack ride-booking platform with separate user and captain workflows, JWT authentication, ride creation, fare calculation, and ride lifecycle management from pending → accepted → ongoing → completed.
- Implemented real-time ride notifications and captain location updates using Socket.IO, with geospatial MongoDB queries to identify nearby captains and Google Maps APIs for geocoding, route distance, duration, and fare estimation.

## Technical Skills

**Languages:** Java, C++, JavaScript, TypeScript, Python, SQL

**Frontend:** React.js, HTML5, CSS3, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs, FastAPI, LangChain, Inngest, Prisma, Google Maps API

**Databases:** MongoDB, MySQL, PostgreSQL

**Developer Tools:** Git, GitHub, VS Code, Twilio

**Concepts:** Data Structures & Algorithms, Operating Systems, DBMS, OOP, Computer Networks

**Coding Profiles:** [Codeforces](#) | [CodeChef](#) | [LeetCode](#)

## Leadership & Activities

**AeroClub, HBTU Kanpur** – Secretary 2024 – Present

- Mentored 150+ students in fabricating an R.C. Aircraft during a two-day workshop; contributed to the club's official website development.

**Technika'26, HBTU Kanpur** – Head Organizer 2026

- Spearheaded 3 robotics competitions (Robo Race, Robo Soccer, Robo War) with 200+ participants; managed logistics, scheduling, and volunteer coordination.

**AutoRob, HBTU Kanpur** – Joint Secretary 2024 – 2025

- Conducted Arduino workshops on gesture-controlled and line-following robots.

## Achievements

- CodeKalesh, HBTU 2025** (Inter-college Hackathon): Ranked **Top 5** out of all participating teams.
- Brainwave 2.0, DTU 2026** (Inter-college Hackathon, Delhi): Selected in Round 1; presented **Sahaay AI**. [GitHub](#)
- Enigma, RIET 2026** (Inter-college Hackathon, Jaipur): Advanced to Round 2; presented **GraminIntel**. [GitHub](#)
- Maintained **1750+ rating on LeetCode**, 1500+ rating (2-star) on CodeChef, and 1050+ on Codeforces. Participated in **ICPC** twice.
